6. Add a Mail account
 - Account Type: IMAP
 - Incoming Mail Server: mra.machlink.com
 - Outgoing Mail Server: mail.machlink.com
 - Sign In

The screenshot shows the 'Internet Accounts' dialog box in macOS. The fields are filled with: Email Address: example@machlink.com, User Name: Automatic, Password: (masked with dots), Account Type: IMAP, Incoming Mail Server: mra.machlink.com, and Outgoing Mail Server: mail.machlink.com. A red error message at the bottom reads 'Unable to verify account name or password.' The 'Sign In' button is highlighted in blue.

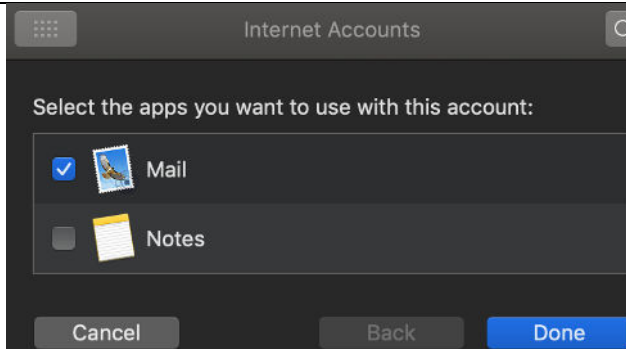

7. Password could not be sent to "mail.machlink.com" securely
 - Continue
8. Password could not be sent to "mra.machlink.com" securely
 - Continue

The screenshot shows a security warning dialog box titled 'Internet Accounts'. It features a yellow warning triangle icon with an exclamation mark and a gear icon. The text reads: 'Password could not be sent to "mail.machlink.com" securely'. Below this, it explains: 'Internet Accounts (System Preferences) cannot send your password securely to the server. You can continue without a secured password, which could put your password at risk.' At the bottom, it asks 'Do you want to continue without a secured password?' with 'Cancel' and 'Continue' buttons.
