6. Enter your MachLink email address, password, and select IMAP account.

A screenshot of the Samsung Email application's "Add new account" screen. The screen has a dark grey background. At the top, there is a back arrow and the text "Add new account". Below this, there are two input fields: the first contains the email address "example@machlink.com", and the second contains a masked password ".....". Below the password field, there are two radio button options: "Show password" and "Set as default account". At the bottom of the screen, there is a white card titled "Select account type" which lists three options: "POP3 account", "IMAP account", and "Microsoft Exchange ActiveSync". A "Setup" button is partially visible at the very bottom.

9. Accept all certificates.

Optional: can change amount of emails downloaded or disable notifications and press next..

Accept all certificates?

Some email accounts require you to accept certificates from all sources. Only select Accept all certificates if you've been instructed to do so by a trusted authority, as doing so may put your emails and account at risk.
